

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SCIENCE

EDITORIAL COMMITTEE: S. NEWCOMB, Mathematics; R. S. WOODWARD, Mechanics; E. C. PICKERING, Astronomy; T. C. MENDENHALL, Physics; R. H. THURSTON, Engineering; IRA REMSEN, Chemistry; J. LE CONTE, Geology; W. M. DAVIS, Physiography; O. C. MARSH, Paleontology; W. K. BROOKS, C. HART MERRIAM, Zoology; S. H. SCUDDER, Entomology; N. L. BRITTON, Botany; HENRY F. OSBORN, General Biology; H. P. BOWDITCH, Physiology; J. S. BILLINGS, Hygiene; J. McKEEN CATTELL, Psychology; DANIEL G. BRINTON, J. W. POWELL, Anthropology.

FRIDAY, OCTOBER 2, 1896.

CONTENTS:

The American Association for the Advancement of Science:—

Address of the Vice-President before Section C.—Chemistry—The Achievements of Physical Chemistry: W. A. NOYES.....461

Section C.—Chemistry: F. P. VENABLE, CHAS. H. HERTY470

Address of the Vice-President before Section H.—Anthropology—Emblematic Use of the Tree in the Dakotan Group: ALICE C. FLETCHER.....475

Current Notes on Anthropology:—

American Linguistics; Primitive Psychology: D. G. BRINTON.....488

Current Notes on Meteorology:—

A Tornado in Argentina; Atmospheric Dust Observations; Recent Kite-flying at Blue Hill Observatory: R. DEC. WARD.....488

Scientific Notes and News:—

A British National Physical Laboratory; Recent Geographical Exploration; The University Scientific Magazine: R. H. T. Inorganic Chemistry: J. L. H. General490

University and Educational News.....496

Discussion and Correspondence:—

Geology in the Colleges and Universities of the United States: FREDERIC W. SIMONDS. *On a Supposed Immediate Effect of Pollen:* HERBERT J. WEBBER. *The Definition of Civil Engineering:* F. O. MARVIN.....497

Scientific Literature:—

Sully's Studies of Childhood: JOHN DEWEY. *Tyler's Whence and Whither of Man:* E. G. CONKLIN.....500

Scientific Journals:—

The Astrophysical Journal; The Monist.....503

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Prof. J. McKeen Cattell, Garrison-on-Hudson, N. Y.

THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

THE ACHIEVEMENTS OF PHYSICAL CHEMISTRY.*

'PHYSICAL chemistry is the chemistry of the future.' These words, quoted from an address by Prof. Du Bois-Reymond, were used by Ostwald ten years ago in the introduction to the first number of the *Zeitschrift für physikalische Chemie*. In using these words Du Bois-Reymond looked forward to a time when it shall be possible to give a mathematical expression to all forms of chemical knowledge. The picture in his mind seems to have been that of a sort of astronomy of the atoms, in which the motions and forces within the molecules shall be known very much as are the motions and forces within the planetary system.

So far as any practical realization is concerned, the thought is still only a poetic fancy, and whatever progress, if any, may have been made, comes to us from organic rather than from physical chemistry. Indeed, it seems to have become the fashion on the part of several leaders in physical chemistry to speak slightly of the atomic and molecular theories. Their thought appears to be that it would be better to confine ourselves to the purely empirical and mathematical concept of the atom and molecule and leave the idea of particles

* Address by the Vice-President before Section C—Chemistry.
